6

million

Over 6 million litres of Westgold UHT Cream and Milk produced annually

Our heritage

Westgold products have been perfected over generations.

From humble beginnings on the West Coast of New Zealand's South Island, almost 150 years ago, our parent company Westland Milk Products continues to craft high-quality dairy products for markets around the globe.

We are proud of our past. The courageous decisions and pioneering spirit of previous generations have shaped our company into today's successful dairy processing business.

Arahura, West Coast 1905

The journey begins in our
West Coast heartland.

Our unique source

Our delicious, high-quality products are crafted with milk from healthy cows on lush pasture.

This, combined with our beautiful West Coast landscape, where fertile soils and high levels of rainfall and sunshine are abundant, make for one of the best dairy farming environments in the world.

Free-range cows, predominantly jersey and kiwi-cross, graze the South Island's lush coastal and Canterbury pastures year-round. Healthy cows and quality grass help produce excellent milk; all elements which pair perfectly to help us create Westgold's unique, rich flavour and award-winning products.

Master's Series

From our experts to yours.

In the demanding, ever changing world of cuisine you need a butter that performs every time. Westgold's Master's Series is created for culinary professionals, traditionally churned with expertise by our master butter makers for perfect results every time.

The Master's Series stamp of quality is a mark you can trust.

Our pioneering forebears set their butter apart using a stamp just like this. Stamping accentuated their butter's consistency and quality — a tradition we retain and celebrate today on our Westgold Master's Series.

Westgold Butter — Crafted to Perform.

Our butter

Loved for its flavour and renowned for its versatility.

Westgold butter is traditionally churned using the time-honoured Fritz Churn method to produce a creamier texture.
